

WHEELS & BRAKES

High Tech Pur

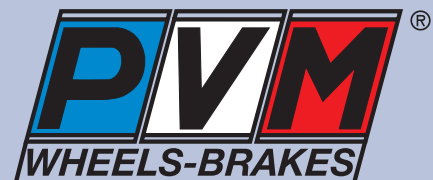

PVM 2-piston monoblock for the rear wheel

- Aluminium
- Resistant to torsion when braking
- Improved braking performance
- More constant pressure point
- Shorter braking distance
- Reduced weigh (up to - 50%)
- brake pad wears more uniformly; no angular wear
- High-quality materials developed for aeronautical applications; constant load-bearing properties at up to 250°C

Technical Specifications

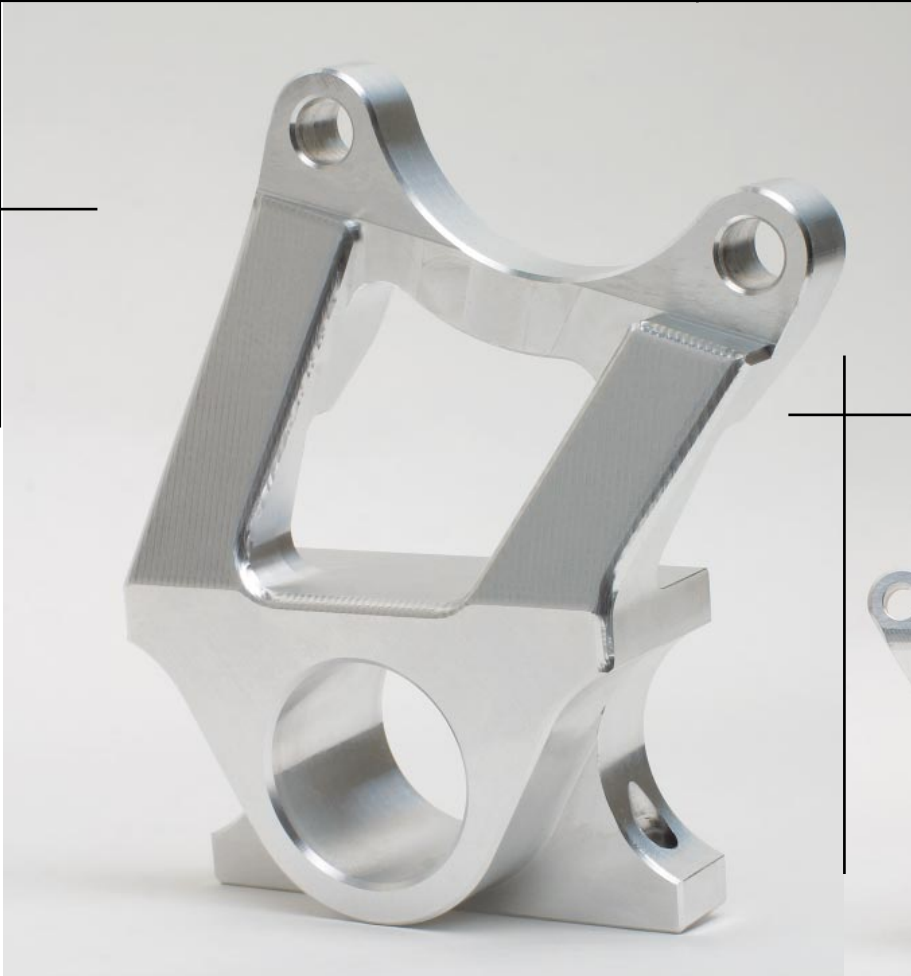

- made from high-temperature resistant aluminium alloy (AlCuMgNi)
- piston diameters 26 mm
- axial mounting, distance 60 mm
- pad same as Brembo / 4-piston monoblock SBK

WHEELS & BRAKES

High Tech Pur

PVM rear piston brake adapter

- made from strengthened anodized aluminium in various colours

Technical Specifications

- manufactured from strengthened aluminium (AlZnMgCu1,5)
- Bolt on System:
 - Yamaha R1, R6
 - Suzuki GSX-R1000 old and new
 - Honda CBR900 / VTR1000Sp1/2
 - Ducati 999
 - Monster from '02 on
- for PVM or original brake discs
