New Colour and Design 2007: PVM forged 20-spoke wheel

Always ahead of the times, the PVM engineers have developed a new design for 2007. Just like all our other forged wheels, the new 20-spoke wheel is completely FEM-calculated and represents further progress with respect to the weight/stability ratio. But even the aesthetes amongst our customers will be delighted with the "multiple spoke" design. The management set the goal of combining form and functionality with the perfect design and this has been technically realised to 100%. We hope this meets with your taste and wish you lots of fun with PVM's new wheel.

Technical Specifications

- forged from AlMgSi1 aluminium
- crop-milled rim
- 100% quality control of the forge
- completely CNC-manufactured and thus virtually 100% free of imbalance and faults
- low unsprung weight and low rotating mass
- agile handling
- more stable than conventional cast wheels
